### EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This office action is response to the amendment filed on November 26, 2007.
2. The 35 U.S.C. § 112 rejections applied against the claims are withdrawn in light of the submitted amendment.
3. The following is the Examiner's statement of reasons for the indication of allowable subject matter:
  - a. After carefully reviewing the application in light of the prior art of record, the amended claims and additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.
  - b. Although the prior art disclose several claimed limitations, none of the references teaches a method of damping parasitic vibrations coming from the front axle assembly of a vehicle fitted with electric power steering, using a power steering electric motor controlled by an electric computer that delivers a target current, which includes the steps processing an received electric signal which possesses a parasitic portion of the parasitic vibration so as to isolate the parasitic portion, calculating from the isolated parasitic portion a correction current for correcting the target current, applying the correction current to the target current in order to control the electric power steering motor, wherein the electrical signal is an available signal relating to the electrical power steering motor (claim 1).
  - c. Claims 1-15 are allowable over the prior art of record.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is
